Personal Statement

Creative talented and innovative graduate in Full-Stack Software development : enthusiastic in database management.Looking to secure a developer role where I can facilitate the objectives of the organization and further develop my Programming skills.

Highlighted Software Applications

Instagram : Fullstack Developer
URL:https://koyooinstagram.herokuapp.com/
A clone of the website for the popular photo app Instagram. This app enables you to follow your friends on Instagram see what they are talking about and comment on them. You can follow your friends to see what they are doing. Implemented SQL database models, and front-end widgets

Instafood: Full Stack Developer
URL:https://mutumamutuma.github.io/InstaFood-App/
InstaFood is an interactive,social and fun web-app. Where users find their foodstaff by just a click of the button and order for meals. It also enables the chefs earn income through the food sold. Pure front-end with good UX UI experience. 23/JULY/ 2018
- Implemented the google map API to show locations of the users for easier delivery of products

Technical Skills
- HTML, CSS
- Javascript - Angular
- Python - Django   Flask framework
- Postgresql API

Personal Skills

Technically proficient with sound communication and relationship management skills
